

# Joining Biomimetics International

An Association and the  
Movement Uniting an Industry

## Uniting Biomimetics: Bio-inspired Solutions, Global Impact

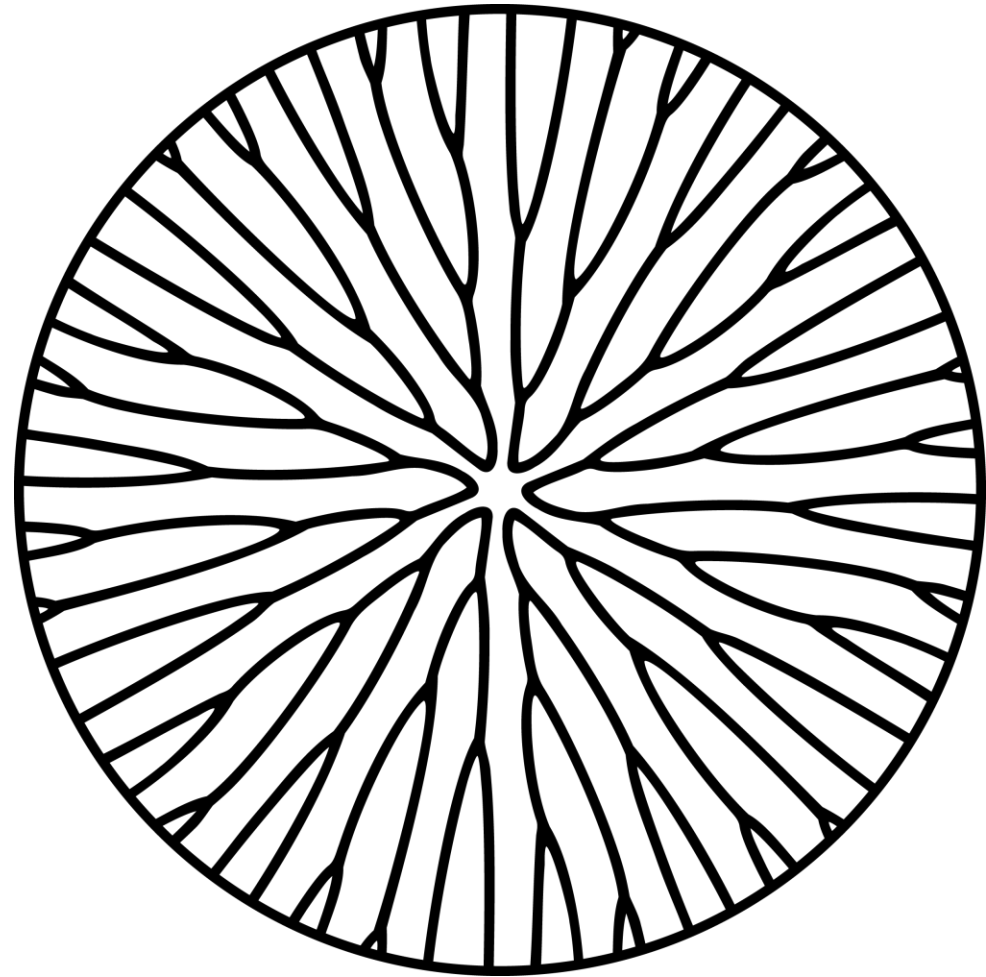

Nature's Blueprints, Reimagined: Driving breakthrough innovations across the BiosVerse™ ecosystem. Where industry leaders and research visionaries unite to scale lab-to-market solutions – accelerating progress needed now for a sustainable tomorrow.

# Why Join Biomimetics International?

As an applied-for 501(c)(6) non-profit business association, Biomimetics International focuses on improving industry-wide conditions rather than providing services to individual members.

This ensures that universities, institutions, corporations, policymakers, NGOs, and foundations benefit collectively from a stronger biomimetics economy.

Members tell us there are four primary reasons driving their decision to join...

## Reason 1. Building Unparalleled Networking & Industry Collaboration

### **Grow and Scale.**

- The industry is reaching a tipping point where biomimetic solutions are becoming essential in business and policy.
- Founding Members gain a seat at the table in shaping the future of the field.
- The success of one is the success of all – as a member organization, Biomimetics International will ensure that every stakeholder benefits from industry-wide progress.

## Reason 2. Collectively Growing in the BiosVerse™

### **Connect and Thrive.**

- Connect with visionary experts, researchers, business leaders, and policymakers to co-create the next generation of sustainable innovations.
- Gain direct access to funding opportunities, corporate partnerships, and global R&D collaborations.
- Be at the forefront of industry discussions shaping biomimetic technologies' future.

## Reason 3. Informing and Shaping Policy

### **Shape the Industry.**

- Biomimetics International is not just a think tank; we are an action hub connecting members to real-world commercial opportunities.
- Showcasing your work on a global stage during BiosVerse™ Week at Biomimetics25 and through the association's advocacy efforts.
- Gaining credibility and recognition as part of a trusted network advancing the BiosVerse™ movement.

## Reason 4. Increasing Visibility & Access

### **Improve the Business Environment.**

- Governments are recognizing biomimetic solutions as essential for climate resilience, sustainability, and economic security.
- Biomimetics International is positioned to help shape policy to support bio-inspired innovation and biomimetic technologies, providing a more significant impact with a unified voice.
- Your voice joins a powerful coalition driving pro-biomimetic legislation, regulations, sustainability incentives, and funding initiatives.

# The time to join is now.

The BiosVerse™ is already shaping the industries of tomorrow. The transition to biomimetic, biosensing, and bio-inspired development is not optional – it is imperative for long-term economic and environmental and economic resilience. By joining Biomimetics International, you position your institution, company, or organization at the forefront of this transformation, where science, business, and sustainability align for global impact.

We invite universities, corporations, policymakers, NGOs, foundations, and industry leaders to join a movement transcending industries and geographies. The BiosVerse™ represents a collective commitment to a smarter, more sustainable world, and Biomimetics International is the gateway to participation, leadership, and impact. Be part of the future. Be a welcome part of the BiosVerse™. [Join Biomimetics International today.](#)
